TABLE OF CONTENTS

1. How the Agency intends to implement and enforce the rule	4
2. How the Agency intends to inform and educate affected persons about the rule	4
3. How the Agency intends to promote and assist voluntary compliance for this rule	4
4. How the Agency intends to evaluate whether the rule achieves the purpose for which it was adopted	5
5. How the Agency intends to train and inform Ecology staff regarding new rule or rule amendments	5

Implementation Plan for Chapter 173-160 -381(3) WAC, Standards for Decommissioning Dug Wells

- 1. Please describe how the Agency intends to implement and enforce the rule. Please include a description of the resources the Agency intends to use.**

Ecology's Water Resources Program will be the lead in implementing and enforcing this rule amendment. Implementation and enforcement will be done by the regional coordinators (one per each regional office) who are located in Ecology's four regional offices and by county inspectors in the sixteen counties that have authority for delegation of the well inspection program.

- 2. Please describe how the Agency intends to inform and educate affected persons about the rule.**

Water Resources Program headquarters staff will incorporate the education and training of this rule amendment into the education and training of the rule amendments adopted on November 21, 2006, Chapter 173-160, the Minimum Standards for Construction and Maintenance of Wells and Chapter 173-162 WAC, Rules and Regulations Governing the Regulation and Licensing of Well Contractors and Operators. The Implementation Plan, publication number 06-11-038, for that rule adoption indicates the following education and training program:

Two Water Resource headquarters staff and four regional coordinators will train and educate affected parties. The trainers will develop a timeline for these activities after the rules are adopted. Within 90 days after the rule amendments are adopted:

- Ecology's Water Resources headquarters staff will train and educate the four regional coordinators.
- Headquarters' staff with assistance of the four regional coordinators will conduct a workshop to train and educate other Ecology program staff, other state agencies, county inspectors, and other governmental organizations.
- Water Resources communication staff will prepare a focus sheet describing the rule changes, to be distributed to the regional coordinators, agency staff, other state agencies, drillers, and other interested parties. This focus sheet and related information will be posted on the Water Resources Program's well drilling website.

For those delegated counties that do not attend the workshop described above, Water Resource's regional coordinators will set up training sessions with the county staff either individually in their offices or as a group with other counties as appropriate.

Within the first six months of 2007, Water Resource headquarters staff and the regional coordinators will train and educate drillers and related businesses at various continuing education training seminars scheduled during that time.

- 3. Please describe how the Agency intends to promote and assist voluntary compliance for this rule.**

Water Resources Program staff will incorporate promoting and assisting voluntary compliance of this rule amendment into promoting and assisting voluntary compliance of the rule amendments adopted on November 21, 2006 as described above. The Implementation Plan for that rule adoption indicates the following for promoting and assisting in compliance.

Water Resources staff intend to promote and assist voluntary compliance by providing the training as described above to drillers, local government, other state agencies, consultants, engineers, hydrogeologists and other interested parties.

Water Resources headquarters staff and the regional coordinators will continue to provide technical assistance to interested parties regarding these regulations as needed. A focus sheet describing the rule changes will be mailed out to drillers and other interested parties within 90 days after the rules are adopted.

4. Please describe how the Agency intends to evaluate whether the rule achieves the purpose for which it was adopted, including to the maximum extent practicable, the use of interim milestones to assess progress and the use of objectively measurable outcome.

Water Resources staff have recently developed a quarterly report which is an online report that will be used by the delegated counties to report well inspection, decommissioning and enforcement activities. Information from the quarterly report will be used by these staff to prepare an annual report. Water Resources staff will meet with delegated counties on an annual basis and use the enforcement information on this report as well as other information gathered from the meetings to evaluate whether or not the rules are achieving the purpose for which they were adopted. Water Resources staff will:

- Use the quarterly reports to measure trends over the year as another way to determine success.
- Meet with the Ecology regional coordinators on a quarterly basis to discuss progress in each region.
- Evaluate success through these discussions.

5. Please describe how the Agency intends to train and inform Ecology staff regarding new rule or rule amendment.

Water Resources Program staff will incorporate training and informing Ecology staff of this rule amendment adopted on November 21, 2006 as described above. The Implementation Plan for that rule indicates the following:

- Water Resources headquarters staff will train and educate the regional coordinators and hold a workshop for Ecology as well as other state agency staff, county inspectors, and other governmental organizations within ninety days after the adoption of the rules.
- Water Resources staff will also distribute a focus sheet describing the changes to the regional coordinators, agency staff, and interested parties within ninety days after adoption of the rules.

6. Please identify supporting documents that may need to be revised because of the rule amendment. Or Identify new supporting documents that need to be developed because of a new rule.

Documents that will need to be revised include:

- Well Tagging Requirements
- A Guide to Washington's Well Operator License Program
- Water/Resource Protection Written Exam Study Package
- Renewing a Washington State Well Operator's License
- Continuing Education for Licensed Well Operators
- Well Drilling Fees

Documents that will need to be developed include:

- A focus sheet describing the rule changes.
- A policy on turbidity which will be done by Water Resources staff and the Technical Advisory Group.
